AUTHOR INDEX

Volume 20 (1988)

Bienstock, D., Broadcasting with random faults (1) 1- 7
Bone, T., C. Jeffries and V. Klee, A qualitative analysis of $\dot{x} = Ax + b$ (1) 9- 30
Brigham, R.C., see R.D. Dutton (2) 113–125
Brucker, P. and W. Meyer, Scheduling two irregular polygons (2) 91–100
Chaty, G., On signed digraphs with all cycles negative (Note) (1) 83- 85
Chrobak, M. and S. Poljak, On common edges in optimal solutions to traveling salesman and other optimization problems (2) 101–111
Colbourn, C.J., D. Jungnickel and A. Rosa, The strong chromatic number of partial triple systems (1) 31- 38
Dearing, P.M., D.R. Shier and D.D. Warner, Maximal chordal subgraphs (3) 181–190
Dutton, R.D. and R.C. Brigham, An extremal problem for edge domination insensitive graphs (2) 113–125
Ehrenfeucht, A. and D. Haussler, A new distance metric on strings computable in linear time (3) 191–203
Galil, Z. and B. Schieber, On finding most uniform spanning trees (Note) (2) 173–175
Goecke, O., A greedy algorithm for hereditary set systems and a generalization of the Rado–Edmonds characterization of matroids (1) 39- 49
Haussler, D., see A. Ehrenfeucht (3) 191–203
Holm, S. and J. Tind, A unified approach for price directive decomposition procedures in integer programming (3) 205–219
Jeffries, C., see T. Bone (1) 9- 30
Jungnickel, D., see C.J. Colbourn (1) 31- 38
Klee, V., see T. Bone (1) 9- 30
Kobayashi, Y., Enumeration of irreducible binary words (3) 221–232
Lee, C.-Y. and J.D. Massey, Multiprocessor scheduling: Combining LPT and MULTIFIT (3) 233–242
Mahmoud, H.M., and B. Pittel, On the joint distribution of the insertion path length and the number of comparisons in search trees (3) 243–251
Massey, J.D., see C.-Y. Lee (3) 233–242
Meyer, W., see P. Brucker (2) 91–100
Myers, D.C., see H.D. Sherali (1) 51- 68
Murty, K.G., A correction to a result in linear programming (Note) (2) 177–180
Pan, L., On the security of p-party protocols (2) 127–144
Parker, J.D., The period of the Fibonacci number generator (2) 145–164
Pittel, B., see H.M. Mahmoud (3) 243–251
Poljak, S., see M. Chrobak (2) 101–111
Rosa, A., see C.J. Colbourn (1) 31- 38
Schieber, B., see Z. Galil (2) 173–175
Sherali, H.D. and D.C. Myers, Dual formulations and subgradient optimization strategies for linear programming relaxations of mixed-integer programs (1) 51- 68
Shier, D.R., see P.M. Dearing (3) 181–190
